DETAILED ACTION

Response to Amendment

1. Responsive to amendment received on September 1, 2004, amended claims 1, 3, 6 and 8 are entered as requested and claims 11–15 are cancelled as requested.

Allowable Subject Matter

2. Claims 1–10 are allowed over prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach a 3G GPRS support node gateway that communicates with a 2G GPRS node by extracting control data received from the 2G GPRS node, sending it to a 3G GPRS support node server and processing data received from the 2G GPRS node.

The closest prior art, Darland et al. (US Patent 5,793,771) teaches splitting the control and data. Darland, however, does not teach 3G gateway receiving communication from 2G node and splitting the control and data and sending the control to 3G server. These features are claimed in independent claims 1 and 6 and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
